DETAILED ACTION

Page 2

Election/Restrictions

- 1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-8, drawn to a wireless phone with a first component and a second component where a second component permanently hinged to the first component and a connector in the second component being adapted to be directly physically inserted into an existing interface port in a computer, classified in class 455, subclass 575.1.
 - II. Claims 9-18, drawn to a computer comprising a modern that is oriented between the interface port and a south bridge in the computer, wherein the south bridge is a chipset Input/Output arbiter that includes necessary interface logic to convey signals from a high speed interconnect bus in the computer, and a packet converter that converts data packets from the wireless phone from a cell phone data packet protocol to a network data packet protocol, classified in class 455, subclass 557.
- 2. The inventions are distinct, each from the other because of the following reasons: Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct if they do not overlap in scope and are not obvious variants, and if it is shown that at least one subcombination is separately usable. In the instant case, subcombination I has separate utility such as a wireless phone with a first component and a second component where a second

Art Unit: 2618

component permanently hinged to the first component and a connector in the second component being adapted to be directly physically inserted into an existing interface port in a computer that does not require a modern that is oriented between the interface port and a south bridge in the computer, wherein the south bridge is a chipset Input/Output arbiter that includes necessary interface logic to convey signals from a high speed interconnect bus in the computer. See MPEP § 806.05(d).

- 3. Because these inventions are independent or distinct for the reasons given above and have acquired a separate status in the art in view of their different classification, restriction for examination purposes as indicated is proper.
- 4. Because these inventions are independent or distinct for the reasons given above and the inventions require a different field of search (see MPEP § 808.02), restriction for examination purposes as indicated is proper.
- 5. Because these inventions are independent or distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.
- 6. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not

Art Unit: 2618

distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Dominic E. Rego whose telephone number is 571-272-8132. The examiner can normally be reached on Monday-Friday, 8:30 am-5 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Nay Maung can be reached on 571-272-7882. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
